Professional Summary

IT graduate and former Junior Systems Developer with hands-on experience designing, deploying, and supporting web-based systems used in academic and administrative environments. Proficient in PHP, JavaScript, React, and database-driven applications. Experienced in software testing practices including manual, functional, and regression testing to ensure system reliability and quality. Seeking opportunities in Quality Assurance, system support, or web development.

Education

Bachelor of Science in Information Technology, Specializing in Web and Mobile Applications
Far Eastern University Alabang — 2020-2025

Senior High School, Information and Communications Technology (ICT) Strand
University of Perpetual Help System DALTA — *2018–2020*

Skills

Programming Languages: JavaScript (ES6+), PHP, Python

Frontend: HTML5, CSS3, React, Vite

Backend: PHP (CodeIgniter), RESTful APIs, MVC Architecture

Databases: MySQL, MongoDB

Software Testing / QA: Manual Testing, Functional Testing, Regression Testing, Exploratory Testing, Edge Case Validation

Tools & Platforms: Git, GitHub, VS Code, Vercel

IT & Technical Support: PC Troubleshooting, System Maintenance, Basic Hardware & Software Support

Experience

Junior Systems Developer Intern — Far Eastern University Institute of Technology *(December 2024 – July 2025)*

- Developed and deployed a Render Farm Reservation System using PHP, CodeIgniter, MySQL, JavaScript, replacing Excel-based scheduling workflows and improving operational efficiency.
- Implemented real-time PC monitoring for availability, maintenance, and reservation monitoring to improve resource utilization and system visibility.
- Developed a Leave Management System integrated with the HRIS, automating Excel-based leave filing, approval, and tracking processes.
- Created analytics dashboards to improve data accuracy and support HR decision-making
- Performed manual, functional, and exploratory testing during system integration, including regression testing after updates to validate system stability and identify edge cases.

Projects

- Alabites Food Ordering Application (React)
  - Thesis project developed for FEU Alabang food concessionaires
  - Built a centralized web platform enabling students to place food orders from multiple vendors
  - Conducted manual and functional testing to validate ordering workflow and identify edge cases in user inputs and order processing
- Portfolio Website (React)
  - Personal portfolio showcasing projects, skills, and personal experiences
  - Implemented responsive layouts and modern UI practices
  - Performed cross-browser and functional testing to ensure UI consistency across devices
- WanderBot – Discord Bot (Python)
  - Developed a Discord bot providing game server monitoring and automated daily reward systems
- RotomDex – Pokemon Wiki Application (React + Vite)
  - Built an interactive wiki-style web application for Pokemon information
  - Integrated PokeAPI to display stats, evolution chains, and detailed data

Certifications

- ITS Python (Information Technology Specialist)
- ITS Databases (Information Technology Specialist)
